New Product Introduction!

**Serial ATA Receptacle Connector
PCB Straddlemount Version
Part Number: D-A0467-02200-00**

Introducing Ranoda's latest product in the Serial ATA connector family! Commencing with the recognition and approval of SATA, Ranoda has produced high quality SATA connectors for the disk drive industry at very competitive prices. The natural progression has moved into manufacturing the mating connectors and Ranoda is proud to offer the SATA Receptacle family to the marketplace. Ranoda's price structure is also very competitive for the SATA Receptacle family.

The PCB straddlemount SATA Receptacle connector shown here has found application with a major disc drive manufacturer for use in an external drive. Ranoda also has a line of SMT and Through Hole Serial ATA Receptacle connectors in both vertical and right angle configurations.

These connectors have applications in External Drives, PCs, Servers, Set Top Boxes, Optical Drives and any other application involving mass storage and transmittal of data.

The Ranoda SATA Receptacle connectors meet all Serial ATA specifications, and can be provided with a range of gold plating thicknesses, dependant upon mating durability needs.

Features:

Meets Serial ATA specification, Revision 2.5

22 Pins - Data and Power

Gold plating on mating ends

Matte Tin plating on solder tails

High Temp Solder Process Requirements

Straddle-mounts to a 1.00 mm thick PCB (Other PCB thicknesses can be arranged)

Mates to Serial ATA Plugs on Disc Drives and other devices

In addition to Straddlemount, Ranoda SATA Receptacles are also available in Through Hole, SMT, Vertical, and Right Angle versions.
